

GREEN TECH CLUSTERS: SUSTAINABLE BUILDINGS, INDUSTRIAL PROCESSES AND FOOD & AGRI PROCESSING

NANO-CATALOGUE

**MINISTRY OF FOREIGN AFFAIRS
OF DENMARK**
The Trade Council

Property of The Trade Council - Bangladesh/
Royal Danish Embassy, Dhaka

Foreword

As Bangladesh and Denmark embrace over 50 years of successful partnerships and synergies, Denmark looks to offer new and innovative technologies for a greener and cleaner future for both the nations.

This 2nd edition of the nano e-catalogue is a continued effort to make available to interested stakeholders in Bangladesh a part of the greentech cluster of Danish technologies for sustainable buildings, industrial processes and advancements in the food & agriculture sector.

This nano e-catalogue has been compiled and published by The Trade Council, Embassy of Denmark in Bangladesh.

Email: gofran@ajs-ventilation.com

AJS Ventilation is a joint venture between the Danish JS Ventilation and the Bangladeshi ABG Interlinks, established in April 2018. AJS Ventilation brings Danish technology in Bangladesh with a fully trained workforce. ABG Interlinks Ltd. and JS Ventilation's partnership, is offering a fresh and very focused approach to the market of ventilation equipment. It's a partnership accompanied by Danish know how and Bengali competencies.

With the use of natural laws and smart design, AJS Ventilation has invented a combined cooled ceiling and ventilation solution, *Cool Ceiling*, which can reduce the building height or provide space for more floors when constructing multi-story buildings. This means: no ducts, design freedom, shorter construction time, no maintenance, and it contributes to lower energy consumption.

Ventilation principles

- ✓ Sustainability
- ✓ Innovative and simple
- ✓ Aesthetics and common sense

Ceiling Radiative cooling: 72 W/m²
 Air cooling: 40 W/m²
 Floor area: 114 m²
 Ceiling height: 2.7 m

- 1 Metal ceiling
- 2 Air inflow unit
- 3 Cool air
- 4 Hollow space/ Pressure chamber
- 5 FanCoil = FC (Optional)

Email: info@solarlab.dk

SolarLab designs and produce bespoke electricity producing facades that invisibly integrate high-efficiency PV on both new buildings and renovations. Available as ventilated rain-screens, curtain-walls and louvered solutions they replace traditional claddings with a low-maintenance, durable and dynamic material and positive financial and environmental return on investment. Solar facades go beyond BIPV and provide cost and carbon free electricity that ensure resiliency without sacrificing rooftops, so they can be utilized for social activities, rainwater management or micro-climate and biodiversity supporting green roofs.

Solarlab provide design freedom to panellise a facade with a non-fading and self-cleaning material to ensure a long life and seamless integration. We produce our solar-facades in Denmark and engineer them for longevity, resiliency and a circular resource economy.

Organisation: Nordicco A/S

Website: www.Nordicco.eu

Address: Karetmagervej 23, 7000 Fredericia, Denmark

Point of Contact: Mathias Thomsen

M +45 29 89 75 64

Email: Mathias@nordicco.eu

Nordicco is a Danish manufacturer of large HVLS fans that help factories and large buildings keep their cooling costs down, prevent heat stress, increase worker comfort and raise productivity levels throughout. It is a climate-friendly way to improve indoor climate, lower energy consumption, reduce CO2 emissions and eliminate the spread of airborne pathogens such as bacteria and viruses

Nordicco is based in Denmark, and rely on Scandinavian design and material components to produce and manufacture their solutions.

Aminodan is a company specialized in wastewater treatment for fulfilling the requirements for releasing the water into sewage system or into a natural emissary. For this, we are using Aminodan DAC and Aminodan AMB technology.

Aminodan has delivered complete treatments systems until now up to a capacity of 1.400 m³/h (33.600 m³/day) and has an international presence. Aminodan already now have projects in Bangladesh in textile industry and industrial parks.

Aminodan systems are custom made and designed in Denmark.

Aminodan has more than 55 years of experience in wastewater treatment.

ecoBETA®

Award-Winning Water-Savers

Organisation: ecoBETA A/S

Website: www.ecobeta.com

Address: ecoBETA A/S, Staunvej 29, 9240 Nibe

Point of Contact: Lisbeth Sylvestre, Managing Director

M +45 9835 5700

Email: ecobeta@ecobeta.dk

ecoBETA addresses water shortages with affordable high quality products. Instead of vast investments into the infrastructure, ecoBETA offers economical products for the final part of the water supply chain – the end customer. ecoBETA's signature product is a dual-flush toilet valve with ONLY 1 button. The ratio of small flushes at public places and businesses goes up to 95%. Hence, having conventional dual-flush toilet valves with dual-button causes only confusion and misuse of the big flush. By applying ecoBETA, we guarantee a minimum of 25% water conservation after installation overall and up to 50 % of water conservation per flush.

Email: annp@aquagreen.dk

AquaGreen is a cleantech company that develops new and innovative solutions for turning biomass like wastewater sludge into resources. Our groundbreaking technology consists of an integrated stream drying and pyrolysis unit, which has been developed and patented in close collaboration with the Technical University of Denmark. The outcome is a highly advanced and scalable solution that allows for turning biomass like wastewater sludge, manure and horticultural waste into biochar and renewable energy while eliminating organic pollutants. The benefits are numerous and include eliminate greenhouse gas emissions and capture CO₂, reduce pollution and health risks, recirculate nutrients, recover energy and more.
